

Equine Pasture Management Day

Sat. June. 25, 2021, 9:30 AM— 12:30 PM

Bloomsburg, PA

Are your pastures looking a little shabby after a long, hot summer of grazing? Are you worried that the grasses are not healthy and that weeds are taking over? Then plan to attend the pasture management field day hosted by Capital RC&D and Quodomine Veterinary Services, and participate in demonstrations and activities designed to help you evaluate your pastures and adopt practices that will benefit your horses, your farm, and the environment.

- Learn how to evaluate your pasture (and have fun doing it!)
- Practice identifying pasture forages and learn about each type
- Learn how grass grows and what it takes to keep grass healthy
- Learn about the new protocol for parasite management
- Learn about the importance of rotational grazing and heavy use areas
- Discover resources that are available to help you improve your pasture

There is no cost but registration is requested by Friday, June 24, 2022

For info or to register, visit www.capitalrcd.org/events

Email: info@capitalrcd.org, or call 717-241-4361 (ext. 15).

Location: Quodomine Veterinary Services, 70 Schoolhouse Road, Bloomsburg,

NFWF

Chesapeake Bay Stewardship Fund

Sponsored by Capital RC&D and Stroud through funding provided by Natural Resources Conservation Service, PA Dept. of Environmental Protection, and Altria Group through the National Fish and Wildlife Foundation's Small Watershed Grants program.
